CLASS : CSE – A

PROJECT : HOSPITAL MANAGEMENT SYSTEM

DATE : 06-08-2021

SUBJECT : ADVANCED JAVA PROGRAMMING

Hospital Management System

Ex No: 2

Date : 12/08/2021

Advanced Swing Components

Aim:

To create a table, structures (look) and features available pages with tabbedPane concept by using swing components.

Algorithm:

- Create a jTree containing the structure of the hospital and add it to the tabbed pane
- Create a jTable containing details of the employees of the hospital with add and delete button and add it to the tabbed pane
- Create a jList with details of medicines available and add action listener to display the selected medicine and add it to the tabbed pane

Code & Output:

```
//Exercise 2 code

package swingDemo;
import javax.swing.*.*;
import javax.swing.table.DefaultTableModel;
import javax.swing.tree.DefaultMutableTreeNode;
import java.awt.CheckboxGroup;
import java.awt.Color;
import java.awt.Font;
```

```
